

HOW TO RECORD A VIDEO

1A. How to use the camera - RECORDING WITH PHONE

- Ask a friend to hold the camera while you speak / perform.
- Hold the phone horizontally and NOT vertically.
- Avoid using the selfie mode as the video quality is lower.
- Only use selfie mode as last resort if you cannot find someone else.

1B. How to use the camera - RECORDING WITH COMPUTER WEBCAM

- Please make sure the computer is on a desk and you are sitting close enough to be seen.

2. Make sure you can be seen clearly

- The room should be brightly lit so we can see your face and eyes clearly.
- DO NOT sit with the strongest light source (eg. the sun) behind you as you will appear as a silhouette.

3. Make sure you can be heard clearly

- Record the video in a quiet environment, preferably indoors.
- Turn off any devices that may interfere with the audio (eg. air conditioners, telephones)
- Please sit close enough so the camera can pick up your voice clearly.

PLEASE DO A TEST RECORDING FOR A FEW SECONDS TO CHECK FOR ALL THE ABOVE.

RECORDING WITH A DSLR CAMERA

If you own any semi-professional or professional camera, chances are you know how to use it. But feel free to email us with any queries.

Please make sure your DSLR camera settings are as below:

- Aspect Ratio - 16:9
- Resolution - 1920 x 1080
- Frame Rate - 25 Frames per second
